**Quaid-e-Azam Muhammad Ali Jinnah**  
**Founder of Pakistan**

The duties required of you now are: Develop a sound sense of discipline, character, initiative and solid academic background. You must devote yourselves to your parents and to the state. You must learn to obey for only then you can learn to command.

## OUR VALUES

### **Respect, Excellence, Leadership, Integrity, Compassion (RELIC)**

Ensure deep Respect for people

We treat people as individuals, promoting an inclusive environment that values the capabilities and contributions of each person.

### **Promote Consistent culture of Excellence**

We are distinguished for innovation and continuous improvement of our competency-based approach to medical education and solution-based approach to health problems.

Demonstrate Leadership in all we do

We are committed to the success of our people, our profession, our patients and our stakeholder's at large, demonstrating leadership at all levels.

Act with Integrity in all of our endeavors

We embrace the very highest standards of ethical behavior and exemplary moral character

Treat with Compassion

**We nurture the spiritual, physical and emotional well-being of one another and those we serve.**

## VISION

To be a leader in medical education and health services and improve the lives of the communities we serve through excellence in learning, innovation, research and healing.

## MISSION

To produce competent and compassionate health professionals to serve the humanity.

To provide supportive environment for enhancing learning and fostering innovation and address the most vexing challenges in health care.

To improve health of community by providing exceptional care and unparalleled medical services through highly qualified and experienced medical professionals with compassion.

## CHAIRMAN'S MESSAGE

**Dr. Abdul Qadir**  
**Chairman**

Margalla Institute of Health Sciences

Vision without action is mere a dream. Action without vision just passes the time, but vision with action can change the era. With clear vision and mission we took the initiative to set up Margalla College of Dentistry, Islamabad College of Physiotherapy & Margalla College of Pharmacy to fulfill the need of ever enhancing clientele. Right from its inception in 1997 Margalla Institute of Health Sciences has emerged as one of the fastest growing professional educational institutes in the field of health sciences.

The institute has been providing standard education through heuristic approach to all individuals who acquire local and global perspective of the diseases process in its entire modern ramification and empowering themselves with skills. Management made extensive efforts to acquire qualified and experienced faculty within the country and abroad. They endeavor to disseminate knowledge and skill under a very congenial and aspiring environment.

I seek Allah Almighty's bestowal and beseech to give us integrity of purpose to make this institute a mark of excellence in all its facets (Aameen)

## MARGALLA INSTITUTE OF HEALTH SCIENCES CAMPUS & CITY

The MIHS campus is located in the scenic surrounding of Rawalpindi / Islamabad, the twin city. The campus is in close vicinity to the high court and is merely 1 KM from the historical Grand Trunk Road. The beautiful Bahria Town and Safari Villas add to the splendor of the surroundings. The building comprises of more than 125,000 square feet of covered area, which has a purpose-built interior with all facilities and infrastructure consistent with the academic and clinical training requirements.

All Basic Sciences Departments in the Institute are spacious having large laboratories, museums and air-conditioned lecture halls. The 150 Beds General Hospital (at Pir Wadhai, Rawalpindi) possesses all basic diagnostics facilities, including Department of General Medicine & General Surgery, ICU and Casualty. The college is unique in its nature as all clinical and academic activities are under one roof.

Margalla has recently acquired a land measuring 25 kanals on the main Islamabad Express Way. The construction of a purpose-built campus and hospitals has already started.

## DEAN'S MESSAGE

**PROF. DR NISAR-UR-REHMAN**

**Dean/Professor**

B. Pharm, Master of Pharmacy. PhD, Post.Doc.

Pharmacy plays a crucial role in the health care and drug delivery system of a country. Pakistan needs highly competent pharmacy professionals to meet the challenges of 21st century. Keeping in view this perspective, we are determined to prepare pharmacy graduates who can play an effective role in the rational use of drugs, adverse drugs action monitoring, safe and effective drug delivery system, proper storage of drugs, and pharmaceutical management & development.

Pharmacists play a vital role in the health of their communities in a variety of settings including hospitals, long-term care facilities, hospital pharmacies, community pharmacies, regulatory agencies and within the pharmaceutical industry.

The mission of Margalla College of Pharmacy is to provide excellent education in a stimulating environment where delivery of superb pharmaceutical care is integrated with nationally and internationally recognized research. In order to achieve our mission we apply innovative and proven educational methods to produce pharmacists who possess the skills and knowledge they need to serve their patients in an ethical and professional manner and make available best possible care for the ailing humanity.

The Curriculum has been designed incorporating the requirements of Pharmacy Council of Pakistan and the latest development taking place in the field of pharmacy globally. Our academic programme is accredited by the affiliated Riphah international university. We will make every effort to create an excellent teaching learning environment and pursue students to unfold their potential, closely interact with the faculty and visiting

We remain committed to extending the scope of the profession and preparing tomorrow's leaders to best serve the needs of the nation. I extend heartfelt welcome to all the new entrants in our Pharm. D (Doctor of Pharmacy) programme and wish you success in all your endeavour and future career.

## INTRODUCTION

Margalla College of Pharmacy (MCP) is a constituent college of Margalla Institute of Health Sciences and its foundation was laid in 2009. The college inducted its first batch in 2010 for 5 years Doctor of Pharmacy (Pharm.D) program, only after its approval from Pharmacy Council Pakistan and affiliation with Riphah International University.

### Mission

Mission of Margalla College of Pharmacy is to provide excellent education in a stimulating environment where delivery of superb pharmaceutical care is integrated with nationally and internationally recognized research.

In order to achieve our mission we apply innovative and proven educational methods to produce pharmacists who possess the skills and knowledge they need to serve their patients in an ethical and professional manner and make available best possible care for the ailing humanity.

### Description

It is the FIRST and ONLY pharmacy institute in Rawalpindi city both in public and private sector. Margalla Institute of Health Sciences is determined to provide the best possible education and knowledge in different areas of health sciences. Recently it has embarked upon a new important discipline of medical science namely; Doctor of Pharmacy, which is a five years degree program

after F.Sc / A level. The curriculum designed is precisely in line with the recommendations of the Pharmacy Council of Pakistan (PCP), Higher Education Commission (HEC) and the latest trends being followed in various developed countries of the world.

During the past 15 years the profession of Pharmacy has attained great importance and significance internationally for ensuring the safe, effective and rational use of drugs, owing to the unprecedented demand of qualified pharmacist in various sectors like hospital pharmacy, industrial pharmacy, retail pharmacy and government regulatory agencies.

Pharmacists play a vital role in improving patient care through the medication and information they provide. In a survey recently conducted, it is the third largest health profession in the United States.

The facility developed in MIHS includes new laboratories for various main subjects on pharmaceutical sciences, provision of new lecture halls which are all equipped with latest audio visual aids.

## What is Pharmacy?

### Should I Apply for this Program (Pharm.D)?

### Should I Adapt Pharmacy as A Profession?

These are the question that students often have about what “pharmacy” really is. Before applying to a pharmacy program, it is a good idea to have an understanding of what you are about to undertake. The following is meant to provide an overview of the profession and answer some of the common questions about studying, practicing and scope of pharmacy in Pakistan and Abroad.

## What is Pharmacy?

Pharmacy is a profession and field of the health sciences that is charged with the provision of ensuring safe and effective use of medications. Traditionally pharmacy and the role of the pharmacist have included the compounding and dispensing of medications, however, more recently pharmacists are playing an increasing role

in providing patient care and services including medication review, clinical practice, and drug information. The pharmacist is also actively involved in drug research and development, evaluation, drug monitoring, as well as consultation. As drug experts, pharmacists are trained in understanding how medications work, their role in therapy for a particular condition, side effects, interactions, and monitoring parameters. They are responsible for communicating this knowledge to their patients, as well as other health care professionals as a member of an interdisciplinary team. Pharmacists are able to assess and determine if the drug therapy will be necessary, safe, and effective in an individual patient, while working as a part of a health care team to ensure this is realized.

Hence, pharmacy is much more than a field of study. It is a career which allows you to use your extensive knowledge of medications in order to improve the patient's drug therapy outcomes and enhance their quality of life.

### What will I Study in Pharmacy (Pharm.D)?

The pharmacy curriculum in Pakistan is being continuously monitored/improved and governed by Pharmacy Council of Pakistan (PCP) in collaboration with the Higher Education Commission (HEC). Prior to applying to pharmacy, you should have qualified FSc. Premedical with at least 60% marks.

During the 5 year Pharm.D program, you will be ready to take anatomy, physiology and biochemistry to learn about what the body is made of and how it works. These courses are usually taken early on in the program, and may be supplemented with microbiology and organic chemistry. In first year, many students also get an introduction to practical pharmacy through a laboratory course (Pharmaceutics). The bulk of the courses are structured in a comprehensive way, so that students learn about a disease, medications used to treat it, how these drugs work, and what types of non-prescription or herbal medications

that may be used, if appropriate. This is usually done by taking courses in microbiology, pathology, pharmacology & therapeutics and natural health products (Pharmacognosy). Throughout the program, there will also be courses in pharmacokinetics (the drug's fate in the body), pharmaceutical chemistry, drug development and drug testing.

In addition, it would be difficult working as a pharmacist after graduation without having any practical experience. The new curriculum has a mandatory set of rotations which occur throughout your studies classes and/or in the fourth and final year of studies. Rotations are done in community and hospital pharmacies, as well as Pharmaceutical industries. Be ready for a busy five years!!!

### **What will I Do After I Graduate (Future Prospects)?**

Graduating with a Doctorate of Pharmacy certainly opens doors for your future. There are a variety of careers that are available to pharmacists, and following is a list and description of the most common ones:

#### **1. Community Pharmacy:**

Approximately, 5 to 10% of graduates go on and become employed/own a community (or retail)

pharmacy setting. In this field, a staff pharmacist is responsible for making sure that the prescribed drug therapy is appropriate, counselling the patients on their medication, and ensuring efficacy through monitoring. The community pharmacist is also available to make over-the-counter drug and herb recommendations and assess if the patient needs referral to another health care professional such as a doctor. As front line health care professionals, community pharmacists can also be involved in putting on clinics, participating in research, servicing facilities such as assisted living homes, and staying current with completing continuing education credits. In this career, there are also ownership and managerial opportunities, as well as preceptorship and mentoring of future pharmacists.

#### **2. Hospital Pharmacy:**

As the title suggests, this is a career which

provide input on their expertise with regard to drug therapy. Hospital pharmacists also participate in research, continuing education, may be part of therapeutic or formulary boards and committees. A career in hospital pharmacy also allows for management, preceptorship, as well as the mentorship of future pharmacists.

### 3. Industry:

There are great opportunities for pharmacists in drug manufacturing, research and development, either with large pharmaceutical companies, or with independent first venture firms. Approximately, 75 to 85% of graduates adapt this field.

Contrary to popular belief that drug representatives are actually pharmacists, the industry has many diverse roles to offer. There are positions in all levels of the company structure, from research, production, marketing, sales, and professional services and all the way up to becoming the CEO (after much experience of course). There are more than 650 local and 50 multinational pharmaceutical manufacturing units in Pakistan, which are wholly solely managed and driven by Pharmacists.

### 4. Academia:

Do you envy the careers that your teachers/ professors have? Being a pharmacist also enables you to never leave university – that is if you become member of the faculty. Some pharmacists, especially those who have completed higher education such as M.Phil or a PhD, are either full or part time professors in their respective departments. This allows them to teach and mentor pharmacy students in the area of their expertise, while contributing to the revision of the faculty/ college curriculum. Many professors also conduct research for the university and hold position

with other faculties such as medicine or science. Faculty members also work with students through practical experiences such as directed studies programs or on-campus research conferences. A very diverse career indeed.

### 5. Regulatory Authorities:

Part of the definition of being a profession requires that pharmacists be self-governing. All pharmacists who are practicing in a particular province or territory belong to a governmental authority/association that governs their profession. These regulatory bodies also require pharmacists to write, review, update pharmacy laws, ethics and obligations, in order to serve as a resource centre for their members, while possibly also advocating for the profession. There exists a proper laid down system for such governing bodies (Pharmacy Council Pakistan and Drug Regulatory Authority). Hundreds of Pharmacists work in these government regulatory bodies varying from Grade BPS-17 to BPS-21. Having permanent government jobs at these high cadres is perhaps the strongest support for the Pharmacy profession.

### 6. Other:

And by “other” this means many many others. Pharmacists may also have careers in advocacy groups, government & non-government associations, as well as serving in developing countries, investment banking, sales and trading, authors...the opportunities are endless. An emerging field is the Biotechnology Drug Design in Pharmaceutical Research.

I hope you can very well realize now as to what a diverse career pharmacy can be and the exciting opportunities that await you.

fee in advance every year. In case of delay they will be liable to pay late fee which will be 5% per month of the remaining amount. No application will be entertained regarding fee concession or rescheduling on the mode of payment.

The fee shall be charged annually on year to year basis only and at the beginning of each year. There shall be no extra tuition fee for supplementary examination and students repeating the year shall be charged 25% less for one year only and after that full yearly fee shall be charged.

The fee deposited will not be refunded to the students whose admission is cancelled due to providing fabricated, false or fake documents. He/ She will also be liable to be rusticated/expelled/ removed from the college roll.

### Pharmacist's oath

A young prospective Pharmacist should feel no hesitation in assuming the following Pharmacists' Oath

- "I promise to devote myself to a lifetime of service for the ailing humanity through the profession of pharmacy. In fulfilling this promise:-
- I will consider the welfare of humanity and relief of suffering as my primary concerns.
- I will do all I can to protect and improve the physical and moral well-being of society, holding the health and safety of my community above other considerations.
- I will apply my knowledge, experience, and skills to the best of my ability to assure rational use of drugs.
- I will uphold the laws and standards governing of my profession avoiding all forms of mis-representation and I will safeguard the distribution of medical and

potent substances.

- I will respect and protect all personal and health information entrusted to me and will never divulge unless compelled to do so by law.
- I will accept the lifelong obligation to improve my professional knowledge and competence to contribute to the advancement of pharmacy and public health.
- I will embrace and advocate changes in the field of pharmacy profession that improve patient care and drug delivery system.
- I will hold myself and my colleagues to the highest principles of our profession's moral, ethical and legal conduct.
- I will keep abreast of developments and maintain professional competency in the profession of pharmacy.
- I will utilize my knowledge, skills, experiences, and values to prepare the next generation of pharmacists.

I take these vows voluntarily with the full realization of the responsibility with which I am entrusted by the public, and further more promise to maintain my honor and credibility in all transaction by my conduct, never to bring discredit to myself or to my profession nor to do anything to diminish the trust reposed in my professional brethren. May Allah help me to fulfill the commitment entrusted to me by my profession "AMEEN".

### Code Of Ethics For Pharmacists

Pharmacists are often the first point-of-contact for patients with health inquiries. This means that pharmacists have large roles in assessing medication management in the primary care of patients. Pharmacists are health professionals who assist individual patient in making the best use of

medications. This code, prepared and supported by pharmacists, is intended to state publicly the principles that form the fundamental basis of the roles and responsibilities of pharmacists. These principles, based on moral obligations and virtues, are established to guide pharmacists in relationships with patients, health professionals, and public at large.

- A pharmacist respects the relationship between the patient and pharmacist
- Considering the patient-pharmacist relationship a pharmacist has moral obligations in response to the trust received from society. In return for this trust, a pharmacist promises to help individuals achieve optimum benefit from their medications, to be committed to their welfare, and to maintain their trust.
- A pharmacist promotes the welfare of every patient in a caring, compassionate, and confidential manner
- A pharmacist places concern for the well-being of the patient at the center of professional practice. In doing so, a pharmacist considers needs stated by the patient. A pharmacist is dedicated to protecting the dignity of the patient with a caring attitude and a compassionate courage beside focuses on serving the patient in a private and confidential manner.
- A pharmacist respects the autonomy and dignity of each patient A pharmacist promotes the right of self-determination and recognizes individual self-worth by encouraging patients to participate in decisions about their health. A pharmacist communicates with patients irrespective of personal and cultural differences.

- A pharmacist acts with honesty and integrity in professional relationshipsA pharmacist has a duty to tell the truth and to act with conviction of conscience. A pharmacist avoids discriminatory practices, behavior or work conditions that impair professional judgment, and actions that compromise dedication to the best interests of patients.
- A pharmacist maintains professional competence and guides the patient A pharmacist has a duty to maintain knowledge and abilities for the benefit of the patients as new medications, devices, and technologies become available and as health information advances.
- A pharmacist respects the values and abilities of colleagues and other health professionals
- A pharmacist acknowledges that colleagues and other health professionals may differ in the viewpoint and principles they apply to the care of the patient. When appropriate, a pharmacist asks for consultation of colleagues or other health professionals to resolve the issue in the best interest of the patient.

## FACILITIES AT MARGALLA

### Library at a glance

Library is working as the center of information for MIHS community. The department aims to provide most dynamic learning and research environment to the users. Library department fulfills the information needs of the MIHS community, by

providing traditional library services as well as streamlines access to wide range of e-resources. The objective of library department is to focus on acquiring right information, processing it and to disseminate the information at the right time to the appropriate users to fulfill their academic needs, we advance the creation, sharing, and

preservation of knowledge through the use of latest tools and techniques.

The library consists of a main hall, which is spread over 3000 sq. feet. The professional library staff is available in library. The library timing are from 08:00 hrs to 15:00 hrs during the regular working days, while before and during the examinations, the library remain open till 16:00 hrs. It is well-stocked library with the latest professional books and journals covering all biomedical and clinical sciences. A digital library access is available for students which also has a dedicated link with

Higher Education Commission (HEC) and has all the latest journals and periodicals.

### Media Society

This society consists of handpicked students with natural talent in fields of media and communication.

The job of this society is to cover the events and happenings at MIHS and provide media support for university publications and data bank.

MIHS produces two publications; a quarterly newsletter, MIHS Chronicles and Healers/Al Shaafi a bilingual annual magazine in order to promote the creative and communicative aspects of learning and provision of a platform for communication and presentation of ideas of students.

These publications are prepared and produced by the dedicated student editorial board under the guidance and encouragement of the experienced faculty editorial board.

### Literary Society

Students are encouraged to join the educational society. In the periodic meeting of this literary society, topics of interest from latest professional journals and current literature are discussed by the students with participation from faculty members.

### Anatomy Museum

Museum is located in the college building in the department of Anatomy. It can easily accommodate 50 students.

It includes models of international standard on human anatomy, embryology and histology, limbs, torso, head and neck, brain, eyes, ear, lungs, reproductive system and pelvis etc. There is

unique model of the hand which very neatly shows both the arches and different tendons, pulleys, arteries and veins, nerves etc.

A model of the forearm is used to teach I/V injection. Models prepared by the students and staff of MIHS are the good addition.

One section of the museum exhibits embryology models, which are extremely useful for the

demonstration to students. There are also more than 100 natural human bones in the museum.

### Pathology Museum

Numerous specimens are taken from the patients' bodies and are preserved in look-through containers for the training of students.

It remains open from 8:00 a.m to 3:00 p.m in winter except on Saturdays and Sundays.

## Research Facility

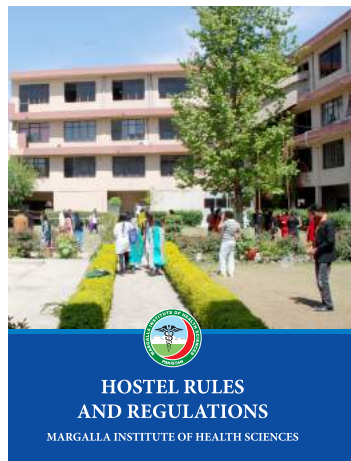

The research facilities will be available to the staff members, to promote research in their field of interest. The students in the final year will also be encouraged and involved in different research projects. Plans are to start different research oriented projects in co-ordination with different research agencies such as US AID etc. Online collaboration will also be utilized for this purpose; with different International Medical Research Organizations and the eminent scientists in different fields of medical sciences.

## Housing for Students

Hostels are situated in Gulrez. These are beautiful buildings having spacious rooms with clean and airy atmosphere. Living rooms have double occupancy. Every student is provided with a bed, a study table, a chair and a cupboard. It has beautiful lawn/terrace for students to sit and relax. It has a common room, TV room and a dining room in addition to the living room. Each room is provided with the facility of attached bath. There is also a prayer room for the students where they perform other religious activities. The warden strictly supervises the messing system and cleanliness of hostels. In case of emergency, medical treatment is provided. Shopping trips for the students are arranged to different shopping places weekly under the supervision of the hostel warden. Telephone facility is also provided to the students in the hostel. Strict security measures for the girls hostel are insured and guards are available round the clock.

There is arrangement of games like Table Tennis and Badminton for the students. No student can leave the hostel without prior permission from the

hostel warden and submission of an application. Only the persons, mentioned by the parents or guardians of the students, in the application form, are allowed to visit the students. The hostel rules and regulation are to be solemnly abided by the students.

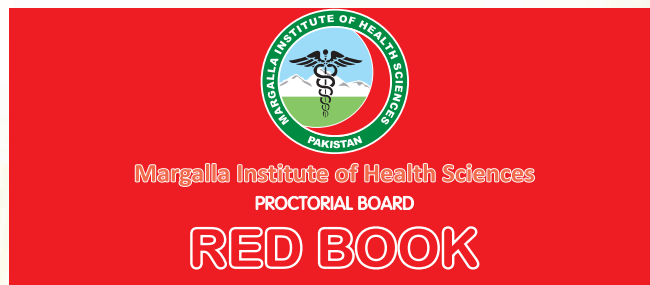

Hostel Rules and regulations in printed form can be had separately.

## Cafeteria

Students are provided with the facility of a spacious cafeteria where food is served at subsidized rates. The management of the college strictly supervises cleanliness and hygienic conditions of the premises.

## Transport

Air-conditioned shuttle service is available for students and staff on payment.

Pictorial Board Red Book in printed form can be had separately.
